Product highlights

SmartClone
Philips remains on the forefront of making installation as simple as possible. SmartClone offers USB cloning, or on select models, revolutionary RF cloning, which allows all TV's on property to be programmed in as little as five minutes. Additional hardware is required to take advantage of RF cloning.

Pro:Idiom™ Plus
Pro:Idiom™ was created for the hospitality industry to protect first run movies and other HD premium content from piracy. Philips Pro:Idiom™ Plus televisions offer secure HD content protection not only for PPV hotels, but now also for stand alone properties. (Additional fees may apply for stand alone use) (Pro:Idiom™ is a trademark of the Zenith Corp.)

VTrack™ forensic watermark
Philips VTrack™ watermarking embeds an invisible forensic watermark in the signal, which can be detected via software to trace pirated content back to the source of recording. Philips VTrack™ is the first solution that protects first run movies and other premium content from optical piracy, helping preserve the early release window that hotels have always enjoyed.

MPEG-4 for HD
MPEG-4 (Moving Picture Experts Group H.264) compression technology allows more HD content to be delivered than ever before. Satellite providers are already using MPEG-4 to offer the choice of up to 150 national HD channels and 1,500 local broadcast HD and digital channels. Cable, broadcast, and telecommunications providers are expected to also migrate to the format, but with these Philips TVs you are ready today!

SmartStand
This TV comes with a swivel stand that allows your guests to adjust the TV up to 180 degrees so that they can watch TV from any position in the room. Equipped with built-in security, this stand can be secured to a table or furniture to deter theft.

Five Star Service
Philips offers unmatched commitment to keeping your guest rooms in working order. Our products are so reliable that we offer a two-year advanced exchange warranty. In the event that something does go wrong, we guarantee to ship a replacement set to you, within 72 hours during the first year.

SmartPower² and ESP
Our second generation power saving technology allows the backlight intensity to be dynamically adjusted by the system to reduce the power consumption by up to 60%, saving substantially on energy costs. In addition, Philips' Energy Savings Programmability (ESP) allows the set to turn itself off when not in use to save even more energy when guests or maids leave televisions on for long periods while the room is vacant.

RoHS & Flame retardant housing
In additon to being lead-free and RoHS compliant, Philips TVs have a special housing of eco-friendly, non-brominated flame-retardant materials. Independent tests carried out by emergency fire services have shown that whereas TVs can sometimes intensify fires caused by external sources, Philips TVs will not contribute to the fire.

USB media autoplay
Philips TVs feature a USB connector that allows the guest to connect USB memory sticks to play music or photos right on the TV.
